## **IMPORTANT INFORMATION RE: LEADED PATTERNED / SOFTCOAT UNITS**

Due to the fact that you cannot lead or apply bevels to most patterned glasses, we will manufacture units of this construction as triple glazing using a clear glass where the lead/bevel will be applied, pattern glass to the middle pane and softcoat to the inner pane.

The only two patterned glasses which we can apply lead and film to is Minster and Stippolyte. So if you order any other patterned glass the units will be made and charged as triple glazed units.

Please note bevelled units will incur a triple glazed cost as we cannot bond bevels to any patterned glass due to its uneven surface.

Orders will automatically be made/changed to triples, if minster or Stippolyte are not specified.
