ENERGY EFFICIENT SOLAR CONTROL GLASS

The Glass Unit for all Seasons

EXCLUSIVE TO CUSTOM GLASS

CustomGlass
Professionals in Glass

www.customglass.co.uk

Custom Glass is proud to introduce the next generation window glass for all year round comfort and energy saving for your home.

Custom Ambient The Glass Unit for all Seasons

With our Custom Ambient Glass, your double glazing can be taken to the next level with our dual coated technology.

Custom Ambient Glass allows a good amount of light to enter the room whilst at the same time controlling the natural heat from the sun, preventing overheating in the summer and reducing excessive heat loss during colder periods.

Used alongside our high performance Clearview roof glass, Custom Ambient Glass in your windows can help maintain a constant temperature and provide year-round comfort. The high light transmittance of the glass also lessens the requirement for interior lighting during daylight hours, helping to cut your energy costs and carbon footprint.

Custom Ambient which has an unbeatable U value of 1.0*, has a dual coating on the inside of the double glazed unit (face 2), consisting of a solar control coating plus a low-e coating. The solar control coating reflects the sun's rays away from your window, which keeps your room cooler in summer. The low-e coating reflects the heat generated by your radiators back into your room, keeping you warmer in Winter.

The additional cost of fitting Custom Ambient Glass over an A-rated unit will be more than covered by the savings you will make on your energy bills over the lifetime of the unit.

Attractive neutral appearance maximises natural light and gives clear views

	U-VALUE 1.0	Keeps homes warm when the weather is cold
	SOLAR HEAT REJECTION 62%	Keeps homes cool when it's warm outside
	UV BLOCKING 87%	Blocks UV from the sun, protecting furniture
	VISIBLE LIGHT TRANSMISSION 71%	Optimal light transmittance allows as much light in as possible

*Based on a unit construction of 4mm custom ambient toughened / 16mm argon filled cavity / 4mm clear toughened
