EXCLUSIVE TO CUSTOM GLASS

Is triple glazing better than double glazing?

Not when it's Custom Glass Ultimate double glazing

The Ultimate 28mm double glazed unit outperforms both standard Low-E double glazing significantly and triple glazing in heat retention, noise reduction and overall efficiency. All of this and at a lower cost than triple glazing.

Now you can achieve in a double glazed unit, the performance of a triple glazed unit without the additional expense

The main benefits of the Custom Glass Ultimate unit

Reduces Heat Loss

U-value measures the heat loss through the unit in Winter Months, the lower the U-Value, the warmer in Winter the room will be.

**U-Value
1.0**

Improves Noise Reduction

The Ultimate Double Glazed unit offer an improvement in the acoustic rating when compared to a standard Low-E unit or a triple glazed unit, making for a quieter environment within the property

**Rw db
35**

Heat Reflection

Overheating in your building during the Summer months is becoming a major problem as global temperatures rise.

The Ultimate Double Glazed Unit reflects the sun's heat away from your windows, therefore reducing heat build-up in the Summer Months.

**Reflection
47%**

Ultraviolet Light

Ultraviolet light can be very damaging to your interior by discolouring carpets, curtains and furniture. The Ultimate Double Glazed Unit offers a high level of protection against UV light.

**Protection
83%**
